

Surgical Information Sheet

Dear Client,

Your pet has been scheduled for a surgical procedure in the near future. Please read carefully all enclosed information. If you have any questions please do not hesitate to give us a call (281-251-0893) We hope this helps with any questions you may have!

We will confirm the appointment the day prior to surgery.

The night before your pets surgery -

1. No food after 8pm the night before surgery.
2. Water is ok to leave for pet up until time of drop off
3. If you are currently administering any medication, vitamins, and/or injections, withhold the morning of surgery unless otherwise instructed by the doctor. The doctor may ask you to bring medications your pet is on the day of surgery.

Please make arrangements for your pet to be dropped off between 7am - 8am the day of surgery. When you arrive the morning of surgery, please allow 5 - 10 minutes for drop off. We will go over pre-anesthetic consent forms, estimate, and take a deposit (which will go towards your bill at check-out).

One of our amazing technicians/or assistants will take your pet to the treatment area where we will document vitals, draw blood for the pre-anesthetic blood testing, and place an IV catheter.

Pre-Anesthetic Blood Work will check to make sure all internal organs are functioning correctly, and will also check for any underlying infection. Placing an IV catheter helps your pet stay hydrated and wake up better from anesthesia.

Once the doctor arrives, they will review the pre-anesthetic bloodwork, any abnormalities you will receive a call. If everything is WNL (within normal limits) we will proceed with surgery.

Our technicians/assistants will be in touch to let you know when your pet is sedated, and also when your pet wakes up from anesthesia. At that time you will be told when to come pick up your pet for discharge (Typically between 4pm - 5:30pm). During discharge you will pay the remaining balance, and have a written discharge the technician will go over with you. Once the discharge is complete, you will receive your pet and be good to go home! Be sure to make your follow-up appointment prior to leaving.
